1. Установить в виртуальную машину или VDS Docker, сделать два контейнера, один для Nginx, второй для MySQL. Прислать скриншоты работающих систем.

```
root@phoenix:~# docker run hello-world

Hello from Docker!
This message shows that your installation appears to be working correctly.

To generate this message, Docker took the following steps:
 1. The Docker client contacted the Docker daemon.
 2. The Docker daemon pulled the "hello-world" image from the Docker Hub.
    (amd64)
 3. The Docker daemon created a new container from that image which runs the
    executable that produces the output you are currently reading.
 4. The Docker daemon streamed that output to the Docker client, which sent it
    to your terminal.

To try something more ambitious, you can run an Ubuntu container with:
 $ docker run -it ubuntu bash

Share images, automate workflows, and more with a free Docker ID:
 https://hub.docker.com/

For more examples and ideas, visit:
 https://docs.docker.com/get-started/

root@phoenix:~#
```

```
root@phoenix:~# docker run mysql
error: database is uninitialized and password option is not specified
  You need to specify one of MYSQL_ROOT_PASSWORD, MYSQL_ALLOW_EMPTY_PASSWORD and
 MYSQL_RANDOM_ROOT_PASSWORD
```

```

Запуск MySQL

Создал несколько, пока игрался.

Пробовал различные ссылки с сайта:

https://docs.docker.com/samples/library/mysql/#no-connections-until-mysql-init-completes

```
root@phoenix:~# docker run --name mysql2 -v /my/custom:/etc/mysql/conf.d -e MYSQ
L_ROOT_PASSWORD=1234 -d mysql
1cc334614509f44da689526646aa8e052fd729105ae13142397db775414b9946
root@phoenix:~#
```

```
root@phoenix:~# docker ps
CONTAINER ID        IMAGE               COMMAND                  CREATED
     STATUS              PORTS                     NAMES
